

IDP4-2B 4 ports fiber optic distribution box

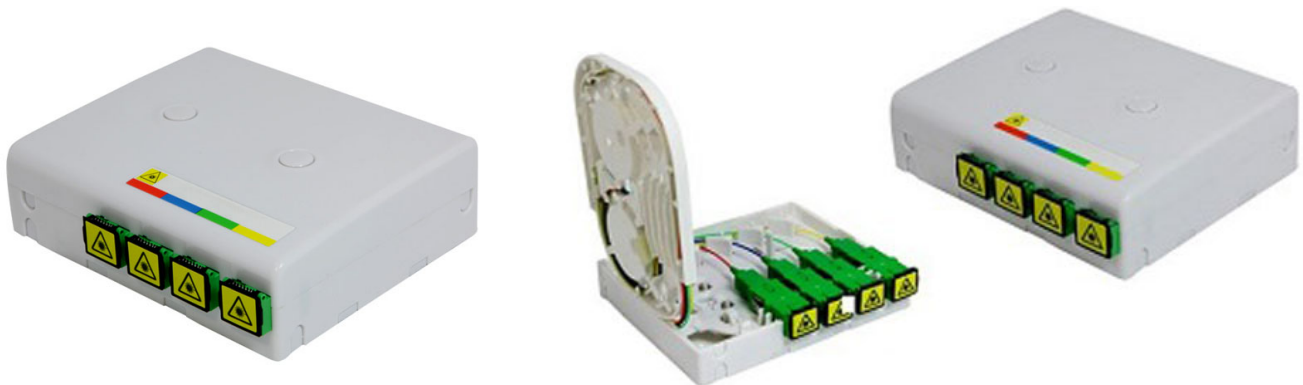

INTRODUCTION

IDP4-2A 4 ports fiber optic distribution box is for FTTH application, to finish the cable termination and the distribution of the drop cable. It can be wall or pole mounted on the outside environment.

Features

- Compact & attractive design for interior wall mounting.
- Cables can enter unit from rear, bottom, top, right hand side or left hand side.
- Supplied with a bracket for wall mounting or mounting directly onto a DIN rail.
- G657A1 fibre pigtails supplied as standard. All fibres are positively managed to maintain a 20mm minimum bend radius.
- Flip tray to allow access to connectorised tails and cable entry.
- Removable cover for easy access. The cover contains a cut out for a label to be inserted and a further transparent cover is supplied to fit over the label.
- Supplied with a security screw to prevent unauthorised access.
- Unit manufactured from fire resistant UL94-V0 rated material.
- Patchcords exit unit on bottom face and are protected by the use of shuttered adapters.
- Standard colour is white RAL9016. Other colours are available on request.
- Can be supplied on a reel with a pre-installed stub of cable for direct mounting without the need to open the box.
