

## ODF-1U-A 1U FIBER OPTIC PATCH PANEL

### INTRODUCTION

ODF patch panels are designed to provide a high density 19" rack-mountable solution for next generation fiber networks, it is used as terminal equipemnt of fiber optical cable for fiber patching,fixation,splicing and management. The ODF patch panel offers superior optical performance, high stability and high reliability, meet various application requirements in FTTH construction , ODN construction, LAN, Metro network and CATV.

### Features

- 19-inch standard size Changeable modules inside
- Suitable for both ribbon and round cable
- With various panels to fit different adaptor interface
- Improved design to assure fiber optic cable bend radius not less than 40mm Suitable for SC, SCD, LC, LCD, LCQ adapers
- All material is RoHS compliant
